PROFESSIONAL EXPERIENCE

Port 8333 LLC (PubKey Bar & Media House)

Chief of Staff

Associate Intern

New York, NY

January 2025 – July 2026

April 2024 – January 2025

- Promoted from intern to Chief of Staff in nine months; served as strategic right hand to the CEO of a Winklevoss-backed Series A company operating across New York and Washington, D.C., leading high-visibility projects across strategy, finance, partnerships, and operations.
- Ran the executive operating cadence and served as connective tissue between the CEO and the broader team: set weekly leadership agendas, attended key meetings and owned the follow-ups to close, defined the KPIs the team steered on, and codified the operating standards the company now runs on.
- Built the models, dashboards, and analyses behind leadership decisions: partnered with the CFO on multi-year operating models and scenario analyses, and authored the operating memos, diligence responses, and quarterly reporting packages that carried a \$26M equity financing and the 12,000 sq ft Washington, D.C. expansion it funded.
- Identified process gaps and fixed them without being asked, as the company's only technical builder: shipped a Python revenue-intelligence platform wiring six third-party APIs (Square, Tripleseat, Google Workspace) and 50+ datasets into live dashboards that retired manual reporting at both venues, with internal tooling built in Claude Code and Cursor now in daily use.
- Owned the institutional partnership portfolio, including the Human Rights Foundation, Gemini, and BTC Inc.: sourced new partners, priced and structured multi-year terms against delivery cost, and monitored delivery through renewal, expanding the portfolio to \$500K+ in annual revenue across 100+ activations.

Compass Real Estate

Data Analyst

Darien, CT

June 2023 – December 2023

- Led market sizing and competitor analyses across three Fairfield County markets, quantifying addressable share and surfacing the highest-potential growth opportunities for regional leadership.
- Automated the quarterly reporting underneath it for all six Fairfield County markets with Python (pandas) workflows across 10+ years of residential sales data, and built the dashboards on agent performance, market share, and transaction trends regional leadership relied on to set strategy.

SELECTED WORK · IGGYDAGS.GITHUB.IO

Six tools designed, built, and deployed solo, most with AI coding agents rather than a team. Among them:

Mantle · Real-estate transaction workspace carried from a 17,000-word thesis to 13 production surfaces.

Job-Search Tracker · Sweeps Greenhouse, Ashby, and Lever for 400+ live postings; a weighted model ranks fit.

Call-Center Staffing · Demand forecast solved for optimal staffing via queuing theory, validated by simulation.

Social Analytics Pipeline · Five channels of exports fanned into dashboards and significance-tested content levers.

EDUCATION

Columbia University

B.S. in Applied Mathematics

New York, NY

May 2025

College of the Holy Cross

B.A. in Mathematics & Renaissance Studies

Worcester, MA

May 2023

Five-year dual-degree program combining liberal arts at Holy Cross with applied mathematics at Columbia Engineering. Student Investment Fund: Portfolio Manager (2022–2023), Analyst (2020–2022).

SKILLS

Excel & Financial Modeling | AI Tools (Claude Code, Cursor, ChatGPT) | KPI Definition & Dashboarding | Executive Memos, Briefings & Presentations | Python (pandas, SQL, API integration) | Process Improvement & Internal Tooling
